

# RaceJoy Race Operations Team Tracking

Race operations can use RaceJoy to track one another in RaceJoy and use the Cheer function to communicate with one another. Your race management team or timer may also track the race operations team from RaceJoy's Race Day Monitoring system.

- 1 Download RaceJoy:** Download the RaceJoy app to your smartphone or tablet from the App Store or GooglePlay.
- 2 Find Race:** Click Featured Races and then access your event.
- 3 Set Up:** Follow the prompts carefully to get set up properly for race day (see below).
- 4 Race Day:** Turn tracking ON in RaceJoy.

## SetUp:

1. Click the **"I Want to Be Tracked"** button
2. Create a **Profile**  
*Suggested approach:*  
**First name:** Enter function you are doing or a code name (example: Sag Wagon). This is what will appear on the map.  
**Last name:** Enter your first and last name here.
3. Select **Course Option**  
Select the main course option for the event.  
*\*Lead, Tail and Pacers need to select the course they are completing in order to receive progress alerts for that course.*
4. Enter a **Bib Number**  
Enter the special race operations bib number provided by the race director or select "bib pending".
5. Finish Following the **On-Screen Prompts**
6. Have a **Battery Plan** for Race Day  
Tracking will drain your battery if using it for an extensive time. RaceJoy typically lasts between 8 and 14 hours with newer phone models.
  - Come with a fully charged battery and turn OFF all non-essential apps such as weather apps.
  - Consider using a portable battery charger such as the Anker Mini.
  - Here are some [Battery Preservation Tips](#).
